

# Pre-flight Safety Checklist

Location:

Pilot:

Date / Time:

Co-pilot:

	YES	NO	NA
More than 3NM (5.5 km) of an airport			
More than 500 m from a helipad			
Safe distance from people, animals, property			
Clear of overhead obstructions (eg. ceiling fans, basketball hoops)			
Clear take-off and landing site identified			
Alternate landing site identified			
Safety signs erected			
Inspect drone frame for cracks and loose parts			
Motors are able to spin freely			
Propellers and hubs free from cracks or damage			
Tuck away loose wires			
All crew wearing safety glasses			
All hair tied back			
All crew standing			
Crew aware of flight height restrictions			
Crew aware of the signal to land			
Crew aware of flight zones			

**Note:** A microdrone (i.e. <250g) can be flown closer to an airport than 5.5km, providing that it is lower than 120m altitude. [See here](#) for more detail. Ensure you stay current with CASA rules and regulations as these are subject to change.
