

Solution Engineer

“I’m inspired by the **different perspective of the world** that drones give me, the applications are endless!”

CHRISTINE MUNISTERI

Christine is a Junior Solution Engineer and drone pilot at GEO Jobe GIS. She developed her interest in geospatial technologies while working with students in Belize as they mapped marine debris and studied flooding and disaster management. With her team at Citizen Science GIS and Open Reef, she uses drones to collect high resolution imagery of coastal communities and vulnerable islands to assist with island inventories, environmental research, and educational endeavors.

Favourite subjects at school: Geoscience, Remote Sensing, Italian, and Marine Biology

Further study: Bachelor of Arts in Environmental Studies
