

Cherie has been a lifelong researcher of suffering. Cherie's personal experience of childhood sexual, physical and emotional abuse coupled with the passion she watched her grandmother pour into the 52 foster children she nourished and loved set her on the course she is traveling today.

Cherie has dedicated her life to the safety and welfare of women and children. Cherie has put her approach to the test by bringing it to the women at the domestic violence shelters. She has worked closely with the Human trafficking organization in her area. She has stood by her women in court fighting for their children. She has sat with women as they testified before homeland security. She has been passionate about walking a line between what is today and what she hopes to one day see.

In her search for freedom she has found her voice! Cherie is an advocate, a healer, an author and the founder of Quantum Therapeutix™. A new approach to PTSD and the lingering effects of trauma.

Cherie is passionate about giving others the short cut to freedom!

- Scholarship Recipient
- Currently enrolled in program

Unofficially Cherie's personal thirst for the understanding led her to study meditation and mind science through the Chopra Center for Wellbeing. She was exposed to amazing minds, Deepak Chopra and the late Dr. David Simon, to only name a few. (She feels especially grateful to have earned Deepak's personal tutelage for a period of time) She studied energy medicine, Theta Healing, Ayurveda, Astral Travel, The S Silva Method and Akashic Records, all supporting her innate intuitive and quantum gifts. She followed her inner voice around the world and back opening the door to many synchronistic interactions with shamans and indigenous in the US, Ireland and New Zealand.
